## MOSAİK

20 PUZZLE  
LARGE SIZE  
DIN A3

This attractive puzzle can be a challenge. The clues help you to create pixel-art pictures in size DIN A3. This folder contains 20 puzzles.

### Rules

Each puzzle consists of a grid containing clues in various places. The object is to reveal a hidden picture by painting the squares around each clue so that the number of painted squares, including the square with the clue, matches the value of the clue.

### Example

- no squares are painted around the 0

- all squares are painted around the 9 including the square containing the 9

- five squares are painted around the 5

### Tipp

Start with the 0's and 9's inside the grid, 6's on the edges and 4's in the corners.

- Analyze all clues one by one. There is always another step somewhere!
- Every new square you paint might become a useful clue later on.
- Never guess! Paint squares only if you are sure they must be filled and mark squares with an „X“ only if you are sure they must be empty.

Note: There is only one unique solution for each puzzle.
